

Construction has commenced on Sunset Well No. 8

News Release Date
03-13-2024

The new well site includes pumps, control equipment, surveillance systems, and piping connecting to the proposed water filtration plant. After the completion of the new well pumping facility, the construction of the filtration plant will begin. Trek Construction has been contracted to do the work, with an estimated completion time of 14 weeks for the well-site pumping facility.
